14.2 Sustainable Development Goals

United Nations Development Programme

On September 25th 2015, countries adopted a set of goals to end poverty, protect the planet, and ensure prosperity for all as part of a new sustainable development agenda. Each goal has specific targets to be achieved over the next 15 years.

For the goals to be reached, everyone needs to do their part; governments, the private sector, civil society and people like you.

Dealing with issues from separate slios doesn't work
